What factor drives or limits consumption for Bright TV?

Insights:
Five factors found to drive or limit consumption

1. Channels: Sport carries the platform by 48%, ICC Cricket and SuperSport. Content concentration at risk
Saturday is peak — Monday inactive.

2. Young Adults and Adults peak at ~18K on Saturday. Monday drops to ~7.5K — a clear scheduling gap to fill

3. Day-part, Evening strong, mornings abandoned
Male prime-time evening dominates at 30K+. Morning and afternoon slots are almost empty — seniors and children have nothing to watch.

4. Regions: Gauteng does all the heavy lifting
GP at ~23K, WC at ~11K. Limpopo, Northern Cape, Northwest under 3K each — rural audiences are not being reached.

5. DEMOGRAPHICS: Age 50+ and children are invisible
Young Adults and Adults dominate every chart. Seniors (04) barely register. Children (01) underserved despite weekend availability. Female viewership very low across all time slots.

Recommndations

Monday is the weakest day across every time bucket.
New content prioritised for Monday to boost weekend comeback.

Wednesday and Thursday are rivals for Friday afternoon.
The mid-week content can boost sustainability throughout the week.

Boost the morning slot programme for the second reliable viewing peak

Although Night & Graveyard slots have minimal viewership, they are present every day.

CVM Team Growth Initiatives
